

SUPPORT

The Swedish Support Stool

The Swedish Support Stool has been developed for professional groups working in a sedentary position where both body support and ability to move freely are required. The seat and the back of the Stool are designed to take the weight off your back and provide maximum comfort.

The fully adjustable back support and bowl-shaped seat ensure proper posture.

All products are manufactured made to order and in exclusive series so that we can meet all your needs including specific requirements on colours and materials.

We also offer a wide range of accessories so that the Stool can be customised to your specific needs.

The Support Stool represents world-class Swedish furniture design signed Bruno Mathsson.
